M. ADITHYA

Technology Leader | Chief Technology Officer

adithyam_m@yahoo.com | +91 98859 01957 |+1 650-550-9030

PROFESSIONAL SUMMARY

- 23+ years in the IT industry spanning full-cycle software delivery, technical architecture, and, since 2024, executive technology leadership as a CTO.
- 12+ years of deep domain expertise in agricultural technology, plus experience across healthcare, telecom, banking, and retail.
- Proven track record architecting, delivering, and scaling n-tier .NET applications, and leading engineering teams of 25+.
- Currently responsible for company-wide technology strategy, architecture, and engineering leadership at Orange Data Cloud.
- Strong background in stakeholder management, team building, and mentoring, with hands-on experience across the full SDLC.

CORE SKILLS

- Languages & Frameworks: C, C++, VC++, C#, .NET Framework, ASP.NET, Entity Framework, WCF REST
- Web Technologies: HTML5, CSS3, JavaScript, jQuery, Backbone.js, Angular
- Databases: SQL Server, Oracle, DB2, PL/SQL
- Cloud & DevOps: Microsoft Azure, CI/CD, SSRS Reporting
- Tools: Visual Studio, TFS, SVN, Rational Rose (UML)
- Domains: Agriculture, Healthcare, Telecom, Banking, Retail
- Leadership: Technology Strategy, Team Building & Mentoring, Stakeholder Management, Agile Delivery

PROFESSIONAL EXPERIENCE

Chief Technology Officer — Orange Data Cloud — May 2024 – Present

Orange Data Cloud (successor company following the acquisition of Gottsch)

- Own overall technology strategy and roadmap, aligning engineering, architecture, and infrastructure investments with business goals.
- Lead and mentor cross-functional engineering, QA, and DevOps teams, driving delivery velocity and technical excellence.
- Drive architecture decisions for scalability, security, and cloud infrastructure, including modernization of legacy .NET systems.
- Partner with executive leadership and clients on technology vision, budgeting, and technology/vendor evaluation.
- Led technical continuity and integration efforts through the company's transition from Gotsch to Orange Data Cloud.
- Champion modern engineering practices — CI/CD, code quality standards, and Agile delivery — across the organization.

Technical Consultant — Gottsch — Jan 2019 – Apr 2024

CattleXpert LLC | Project: CattleXpert Legacy/Rewrite

- Led requirement gathering, estimation, and technical design for an agricultural cattle-management platform covering feeding, processing, and accounting.
- Served as technical architect for new features, partnering with design leads on feasibility and solution design.
- Managed a team of 25+ developers and test engineers, handling resourcing, scheduling, and delivery coordination.
- Coordinated across R&D, QA, and database teams; produced functional and technical design documentation using OO methodology.
- Reported project status and issue resolution to senior management and led hiring for open engineering positions.
- Environment: .NET C#, ASP.NET, HTML5, CSS3, jQuery, WCF REST, SQL Server 2012, SSRS, Unity Framework

Technical Manager & Architect — Prokarma — Dec 2012 – Nov 2018

Project: CattleXpert Rewrite

- Architected and managed development of the CattleXpert platform, overseeing a team of 25+ developers and test engineers.

- Owned end-to-end delivery: requirement analysis, architecture, development, testing, and production support.
- Coordinated with R&D, QA, and documentation teams; authored technical design documentation.
- Environment: .NET C#, ASP.NET, HTML5, CSS3, jQuery, WCF REST, SQL Server 2012, SSRS

Technical Lead — Prokarma (CattleXpert LLC) Nov 2010 – Dec 2012

- Delivered analysis, design, development, and testing for new features on the CattleXpert platform.
- Oversaw QA procedures and coordinated with documentation and QA teams to deliver on schedule.
- Environment: VC++, COM, VB6, DB2, MS Access

Early Career 2003 – 2010

- Senior Software Engineer / CSC (Computer Science corporation) (Module Lead, Thomson Reuters Micromedex) — developed healthcare decision-support browsers (C/C++/VC++, Cobol, JCL, mainframe) for the Micromedex drug-information platform.
- Senior Software Engineer / Satyam (Module Lead, Thomson Reuters Micromedex) — developed healthcare decision-support browsers (C/C++/VC++, Cobol, JCL, mainframe) for the Micromedex drug-information platform.
- Senior Software Engineer, Value Labs (Radiant Systems) — built integrated POS/payment controller software for the petroleum retail industry (C/C++/VC++).
- Software Engineer, Accenture Services — contributed to the WALL multi-display toolkit for large-format tiled screens.
- Software Engineer, Trendz Technologies & Nuclear Fuel Complex — delivered serial communication and supplier-tracking systems (C/C++, Oracle).

EDUCATION

- Master of Computer Applications (MCA), Bharathidasan University — 2003, First Class
